**LEGAL NOTICE PUBLIC HEARING** – The Division of Air Quality (DAQ) will conduct a public hearing on a proposed amendment to Regulation 1138, Emission Standards for Hazardous Air Pollutants for Source Categories. In 2001, Delaware adopted by reference the federal Maximum Achievable Control Technology (MACT) standard applicable to halogenated solvent cleaning operations (40 CFR Part 63 Subpart T) as Section 8.0 of Regulation 1138. Since that initial adoption, the EPA has revised this federal MACT standard several times. The most significant of these revisions was the adoption of facility-wide 12-month rolling total halogenated solvent emission limits (72 FR 25138, May 3, 2007). This more stringent requirement was incorporated into the federal MACT standard after the EPA determined that following the full implementation of the MACT requirements, the original MACT requirements did not protect the public's health with an ample margin of safety, as required under the Clean Air Act. Delaware is proposing to amend Section 8.0 of Regulation 1138 by adding the facility-wide emission limits and their associated monitoring, recordkeeping and reporting requirements that the EPA promulgated on May 3, 2007. The public hearing on this proposed amendment to Section 8.0 of Regulation 1138 will be held on Wednesday, August 24, 2011, beginning at 6:00PM in the DNREC's Richardson and Robbins Auditorium, 89 Kings Highway, Dover, DE.
